

VERSION 0.1

How to Write a TypeScript Library

September 15, 2017

Contents

1	Fundamentals	2
1.1	Setup tsconfig.json	2
1.2	Implement your library	3
1.3	Create an index.ts file	3
1.4	Configure package.json	4
1.5	Configure .npmignore	5
1.6	Publish to npm	5
2	Create a consumer for your library	6
2.1	Create a folder	6
2.2	Create a package.json	6
2.3	Link your library	7
2.4	Consume your library	7
3	Unit testing a TypeScript library	8
3.1	Install packages for unit testing	8
3.2	Writing your first unit test	8
3.3	Run the unit test(s)	9
4	Building an Angular Library?	10
4.1	How to write an Angular library	10
4.2	Create a new project with the AngularCli	11
4.3	Create a new module	11
4.4	Build your library module	11
4.5	Publish	13
5	Writing a command-line executable with TypeScript	14
5.1	Add execution instructions	14
5.2	Modify the package.json	14
